Spec for ADR

Please record the ADR / VO to match the TC of the video Juniper/client provided.
Sample rate is to be 48k

ADR Mics

Sennheiser 416 on one track
LAV Sanken COS-11SBP on the other track

If these mics are not available, please call or email for equivalent shot gun and LAV mics recommendations from us. (Contact info below.)

Delivery to Juniper

Please give us a ProTools 9 or 10 session zipped.
If a Pro Tools session is not doable, an OMF/AAF is okay.
(FTP delivery, see below.)

Track Layout

Please put select recordings on one set of tracks and alt recordings on a 2nd set of tracks.
All other takes should be on tracks below the select and alt.

Contact info.
